The spa stay begins with an initial medical examination by a doctor and the necessary diagnostics. On this basis, the physician determines the type and stage of the disease and prescribes an optimal composition of applications. During the therapy, the doctor makes up examinations and a final examination at the end with recommendations for further treatment regime. A certificate for the insurance is issued on request. The sheet is to be seen as general template of the spa treatment sets. The individual treatment program with specific treatments based on the entrance medical examination sets the physician. The wishes of the guest are considered as far as possible.
